Dear Mr. Castro,

Thanks for the clip and the enclosed wire stuff, all of which is helpful for the historical record.

Anything else you can send like it will be appreciated now and useful in the future.

Today's Wx Post had a full page of letters on and about the movie, "JFK."

I enclose a highlighted copy of mine on the chance your paper or others you know might want to question former Commission counsel in California about this.

What this really means is that the Commission knew very well that it was palming a false account of the JFK assassination off on the country.

While nobody is more responsible than Specter, all the Members and pretty much all of the staff really did have to know what I say.

And have been silent since.

Thanks and best wishes,

Harold Weisberg
